## Benefits

Hair graying is one of the earliest and most obvious signs of aging. The causes of hair graying include internal and environmental factors, and emotional stress is the main cause of hair graying.

Stress causes the release of the hormone norepinephrine, which depletes the melanin stem cells in the hair follicles. When the hair follicles permanently lose their melanin stem cells, the hair turns gray.

The latest scientific research shows that the stress-induced hair graying process can be reversed. The effective ingredients for reversing hair aging include MelanoGray™ from Swiss, which is made from citrus, and camellia seed extract and camellia oil;

Containing active plant ingredients of ginger and ginseng root extract, polygonum multiflorum root extract, Camellia Blossoming Shampoo can promote scalp renewal, reduce hair loss, and resist whitening and encouraging hair growth.
